A Sea Horse hanging Decoration made from a Polystyrene Ball covered with Foam Clay

Make your very own sea horse from a polystyrene ball covered with Foam Clay. You may insert an eye pin into the top of the sea horse for hanging.

Make the head by rolling out Foam Clay flat and covering the polystyrene ball with the Foam Clay.

Model Foam Clay parts as illustrated in this photo.

Assemble all the parts and roll the tail into a coil.

Push plastic eyes into both sides of the head and model little cheeks from Foam Clay.

Push an eye pin into the top of the sea horse and feed a piece of string through the loop if you want to use it for hanging.
