You may place the hotel or the bugs B&B outside just as it is or you may varnish the outer surfaces with weather resistant and water based lacquer if it is exposed.

The insect hotel or bugs B&B may be painted with craft paint which is available in a multitude of colours. Place the hotel or bugs B&B in a secluded location to encourage insects and larvae to move in.

An Insect Hotel or a Bugs B&B painted with Craft Paint

An insect hotel or a bugs B&B is an ideal place for insects when laying eggs, hatching larvae etc. The insects repay the hospitality by, for example, helping to pollinate plants outside in the wild around us.
