## Build a Snowman from Polystyrene and Foam Clay

Cover polystyrene balls lightly with Foam Clay and decorate them with accessories for snowmen. The result is an adorable little snowman which can be enjoyed for longer than a normal snowman. Even very young children can join in with this idea and will love building their very own snowman that doesn't melt.

Roll or press the Foam Clay flat.

Cover polystyrene balls with the rolled-out Foam Clay.

Make a stripy scarf by twisting white and a red pipe cleaners around each other.

Tie the scarf around the neck and trim.

Stack the Foam Clay covered polystyrene balls on top of each other so that the snowman's body takes shape.

Push eyes, buttons and a nose onto the snowman.

**Another variant**

Add pink cheeks with glitter glue.

Push in twigs for arms and add a hat. You may attach the hat with a fresh blob of Foam Clay.
