

A Ghost Keyfob as a Pendant for a School Bag

Make a pendant for a school bag with a keyring with a small ghost attached. Cut out the ghost from iron-on reflective film and iron the ghost onto craft felt. Attach a keyring with a chain to the ghost and attach the finished ghost keyfob to the bag.

Print out the template which is available as a separate PDF file for this idea. Copy the ghost onto iron-on reflective film and cut out. Punch out stars with a star shaped paper punch.

Punch two eyes in the ghost using a screw punch. Use a larger hole setting for the open mouth on the screw punch.

Place the back of the ghost and the stars on the craft felt and iron directly onto the iron-on reflective film.

Finally remove the protective foil from the iron-on reflective film shapes when they have cooled.

Draw a circle around the design using a template. Cut out the circle.

To finish the keyfob, make a hole in the craft felt circle using a screw punch. Attach a keyring with a chain to the craft felt circle using two pliers.
