

Decoupage

Decoupage is a decoration technique for covering items with cut-out paper designs or napkin designs using glue lacquer and a brush.

01 Prime with paint and leave to dry, before decoupage your chosen item. Wash glass items beforehand.

02 Tear or cut out designs from paper/napkins.

03 Apply a coat of glue lacquer to your chosen item and attach the torn or cut out designs.

04 Apply two or three coats of glue lacquer to the covered item and leave it to dry.

Decoupage on glass and porcelain:
Wash the item in warm water and dry thoroughly before starting the process. When the decoration is finished and the glue lacquer is dried for approx. 2 hours, fix it in a household oven at 160°C.

Decoupage on wood, papier-mâché and similar:
Prime the item with white paint so that the design looks as clear as possible. The decoupage lacquer is applied with a brush to a glossy finish. Drying time is 1 hour.

Decoupage on fabric and leather:
Use decoupage lacquer designed specifically for fabric. Drying time is approx. 1 hour. Fix the item with an iron so that it may be washed by hand.

Decoupage with thick paper:
It is possible to use thick paper similar to napkins and similar. Use special adhesive for paper decoration. Finish with a varnish for a waterproof finish.
