## A Jewellery Set

01

Pull beads onto a beading wire at your desired length. Close both ends with a bead tip and a crimp bead.

02

Attach the clasp with an oval ring. Put a ring in the other side.

04

Open a link in the other side and attach a tear drop end bead. Now you can vary the length of the chain.

### A Necklace

### A Chain Bracelet

01

Put beads with small holes onto a head pin. Snip off some of the pin and form a loop.

01

Cut two pieces of leather cord and glue them in an end cap.

02

One end of a piece of beading wire is closed with a bead tip and a crimp bead. Pull beads onto the wire and close in the same way as at the beginning.

02

Before closing the loop completely, attach this pendant to the chain.

03

Attach a clasp with an oval ring in one side.

03

Connect the piece of beaded wire with the piece of leather cord with an oval ring.

04

Put beads onto a head pin. Twist to make a loop and attach a round jump ring before closing completely. Put the pendant onto the cord before connecting the other side.

05

Finally attach the chain and a clasp.

## Earrings

01

Twist a head pin around a marker pen.

02

Put beads onto another pin. Cut off and twist to make a loop which is then attached in the loop of the ear wire.
