

A Superstar

STEP BY STEP 023

Inspiration: 11918

01 Cut six pieces of paper measuring 14 x 14cm.

02 Fold the piece of paper into a triangle.

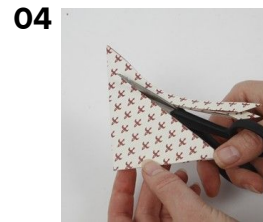

07 Turn over the paper and repeat step No. 6 on the other side.

08 Assemble all the squares into a star. Start from the middle by attaching power tape in the middle of the star.

03 Fold the triangle once more into an even smaller triangle.

04 Cut five incisions, each approx. 1cm wide, from the open edge of the triangle. Stop approx. 1cm before the folded edge.

09 Attach power tape onto the sides of the star. The star can now be fully assembled.

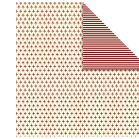

05 Unfold the triangle.

06 Attach power tape onto every other point and glue the points together.
