A Robot Photo Frame covered with Foam Clay

A photo is inserted into this robot photo frame. The frame is then decorated with Foam Clay according to your own imagination. Rhinestones are pushed into the Foam Clay for further decoration.

Remove the backing and the transparent acrylic sheet from the frame.

Glue a photo onto the backing and place the acrylic sheet on top.

Reassemble the parts inside the photo frame.

Cover the robot photo frame with Foam Clay according to your imagination, attached like small balls, distributed in an even, thin layer.

Decorate with rhinestones according to your taste by pushing each individual rhinestone into a new blob of Foam Clay which is then attached onto the frame. Leave to dry.

Robot Frame, H: 17 cm, carving: 6x6.5 cm, MDF, 1pc 576610

Foam Clay®, blue, 35g 78922

Foam Clay®, neon green, 35g 78927
