A Silk Clay Angel on a mechanical Movement

This small angel is modelled from Silk Clay onto a mechanical movement with a wind-up function. The small nylon wings, the sequins and the silver thread hair are glued on.

Mix Silk Clay for your chosen skin tone; here a light skin tone. Make the angel's head as a round ball.

Cover the mechanical movement with Silk Clay; make a flared dress in your chosen colour but avoid covering the wind-up mechanism.

Another example

Another variant

Roll out Silk Clay sausages. Push these as well as the head and a sequin for decoration onto the dress.

Hair: Cut a piece of silver thread and wrap it like a bundle around three (3) fingers. Glue the hair onto the head and a large sequin onto the hair for decoration. Use Clear Multi Glue gel.

Glue the finished lightweight wings from thin metal wire with delicate nylon onto the angel's back using Clear Multi Glue gel.

Draw the eyes and the mouth with a black Colortime marker.
