An Egg with patterned Decoupage in pink Harmony

A lifelike plastic egg covered with patterned
decoupage paper in rose and yellow shades.

Tear/cut small pieces of
decoupage paper. Cut/tear
small notches in the paper for
it to easily follow the rounded
shape of the egg for a smooth
finish. Attach and varnish the
paper with decoupage
lacquer. A TIP: To help the
process, insert a flower stick
into the the egg.

Insert a metal hanger (a loop
with a collar & legs) into the
hole of the egg; squeeze the
two legs together, push them
into the egg and slowly let go.
Attach a piece of string to the
loop for hanging.
