Bracelets with Faceted and Metal Beads

A delicate, thin bracelet made from cotton cord with an eye pin with faceted and metal beads as well as a pendant. Fastened with a magnetic clasp.

Double over a piece of cotton cord and pass the loop through the loop of the eye pin.

Put faceted beads onto the eye pin with crimp beads in between. Put a metal bead in the middle.

Carefully bend the eye pin with the beads to form a natural curve around the wrist.

Cut off approx. 2 mm of the end of the eye pin and twist to form a loop using round nose pliers.

Tie a doubled over piece of cotton cord onto the loop like you did at the start.

Put a tassel and a metal pendant onto an oval jump ring and attach the oval jump ring to the loop of the eye pin.

Cut the cords to the desired length (all the same length). Squeeze a drop of glue inside each part of the hollow, two-part magnetic clasp and push each pair of cord ends inside.
