A Valentine Card

A lovely Valentine card for a loved one made in Vivi Gade Design paper. The hearts are punched out with paper punches in different sizes and then attached with 3D foam pads.

01

Punch out six small, one medium and one large heart. Cut out a square and tear it all the way along the edge. It must then measure approx. 5x11cm. Attach silver thread to the back of two of the small hearts and lengthwise on the torn paper.

02

Attach the square paper and the two hearts' silver thread onto the card with E-Z Runner. Attach the rest with 3D foam pads.

03

Finish with a row of rhinestones along the edge of the card.
