## Necklace with a Prism in a Net made from a Nylon-covered Alu Bar

The pendant is a prism in a shaped net made from an aluminium bar which is covered with coloured nylon cord wrapped around it. A piece of neon pink macramé cord is attached to the pendant to make a necklace.

Shape a nylon cord covered aluminium bar into a loop at the top. Underneath the loop, shape an area roughly the same size as the prism.

Twist the aluminium bar tightly around the prism like a 5-pointed star. Finish where the loop is. The loop will function as the pendant's eyelet.

Twist the aluminium bar a couple of times around the loop.

Melt the nylon cord on the aluminium bar where you want it to finish. Use a lighter.

Use side cutters for cutting off the aluminium bar where the cord has been melted away.

Twist the end of the covered aluminium bar around the loop and insert a piece of neon pink macramé for the necklace.
