

Self-hardening stamped clay place cards

Make personal place cards from self-hardening clay. Use stamps with stamp ink to put patterns and names on the clay.

Inspiration: 16616

1

Dab a stamp in stamp colour and print the motif on the clay. Tip: If a small amount of ink appears next to the stamp print, it can be removed with a little water.

2

Stamp the clay with letters, but remember to mirror them.

3

Roll out the clay until it is 0.5–1cm thick. Cut out a circle with a cookie cutter and make a small hole for hanging with a flower stick or similar.
