

A Leather Bracelet with a Jewellery Buckle

A bracelet decorated with macramé cord threaded through the punched out holes and with a jewellery buckle. Fastened with a hook clasp.

Inspiration: 11801

1

Cut a approx. 19cm long piece of leather band. Make indentations approx. 1cm apart. Remember to do an odd number of indentations.

2

Punch out holes using the smallest setting on the hole punch pliers. Light pressure is enough for making the holes.

3

Thread a piece of 2mm thick macramé cord through the holes.

4

Place the jewellery buckle in the middle.

5

Glue the end of the macramé cord onto the back of the bracelet. Push some glue into the hook clasp when glueing on the leather band.
