

A Bracelet, a Ring and Earrings made from Foam Rubber

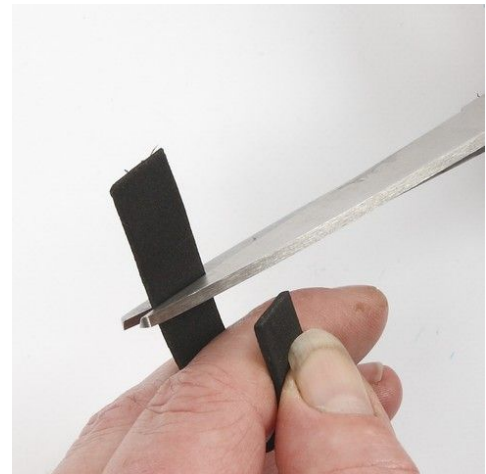

Cut a piece of foam rubber for a bracelet, a ring and earrings. The pieces are threaded onto a piece of elastic beading cord for the bracelet and a head pin for the ring and the earrings.

Inspiration: 12992

1.

For the bracelet: Cut foam rubber into 1x1cm squares and thread them onto a piece of elastic beading cord with Howlite beads inbetween.

2.

For the ring: Cut a strip of foam rubber to fit the circumference of a finger.

3.

Insert a head pin into each end of a small piece of foam rubber with a bead and small foam rubber squares inbetween. Finish by gluing on an end cap.

4.

For the earrings: Cut a strip of foam rubber and attach this onto a ball head pin, making it wavy. Attach beads between each "wave".

5.

Finish the ball head pin by twisting to make a loop with a pair of round nose pliers. Attach the finished pendant onto a French earwire.
