

Colourful Christmas

Fun and colourful Christmas ideas for cosy moments with the whole family

Christmas wreath with decorations in fine clay and pipe cleaners

Step-by-step
instructions

1 - Choose two colours of fine clay and knead them well to make them soft and workable. Roll out each colour into sausages of equal length with a diameter of about 8 mm each. To get a smooth and even surface with a smooth result, you can use a piece of cardboard as a roller.

2 - Twist the two sausages together as shown in the picture.

3 - Roll the two twisted sausages so that they fit together. Use a piece of cardboard again as a roller to ensure a smooth, even and uniform result. If necessary, twist the sausage a little while rolling, so that the stripes are not too straight. Continue rolling the sausage until it is around 8 mm thick.

4 - Cut the sausage into three equal pieces of around 14 cm each. Gently shape the edges with your fingers to make them round and even. Bend one end of each piece into an arch as shown in the picture.

5 - After the candy canes are shaped as shown, place them on a baking tray lined with baking paper. Cure the canes in a preheated oven at 120°C. Baking time: min. 18 minutes, but the exact time depends on the thickness of your candy canes. Allow to cool completely and then harden for 2-3 hours until completely firm. The candy canes are now ready for your wreath.

6 - Make bows out of pipe cleaners by shaping the pipe cleaner into the classic bow shape as shown in the picture.

7 - Twist both ends of the pipe cleaner around the centre to create a firm and attractive bow. Repeat the process until you have as many bows as you need.

8 - Tie the wire tightly around the wreath.

9 - Tie the spruce to the wreath with wire as shown in the picture. Continue all the way around until the wreath is full and has a dense and uniform look.

10 - Place candle holders wherever you want your candles to be placed. Once attached, glue the bows and candy canes around the wreath wherever you like.

11 - Place the candles in the candle holders. Cut another piece of satin ribbon and tie a bow at the bottom of each candle to give the wreath an extra decorative look. Tip: You can also cast your own candles for the wreath.

Graphic paper angels

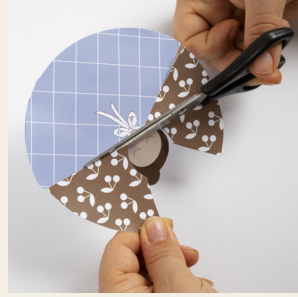

Step-by-step
instructions

1 - Cut along the edge of the angel and up to the chin on both sides of the angel's face.

2 - Cut along the two marked lines to make a notch at each point.

3 - Fold the angel and join it together at the two notches that you just cut.

4 - When folded, the angel looks like this.

5 - Now make a halo out of the pipe cleaner as shown in the picture.

6 - Secure the halo by placing a small dab of sticky base on top of the angel's middle.

7 - Insert the halo through the top of the angel and secure it with Sticky Base. Then apply glue to the wings and finish by sprinkling them with snow.

Colourful pom-pom Christmas trees

Step-by-step
instructions

1 - Cover the polystyrene cone with sticky base. Leave the bottom free.

2 - Place the green pom-poms around the cone. Press firmly to attach.

3 - Fill the outside of the cone with different sizes and colours of pom-poms. Make sure to press the pom-poms firmly.

4 - Insert an eye pin through a pom-pom and down through the top of the cone. Have the eye pin stick out 1-2 cm.

5 - Attach a self-adhesive EVA foam star to one side of the eye pin.

6 - Attach a self-adhesive star on the opposite side so that the branches fit together.

Charming Christmas town made out of fused beads

Step-by-step
instructions

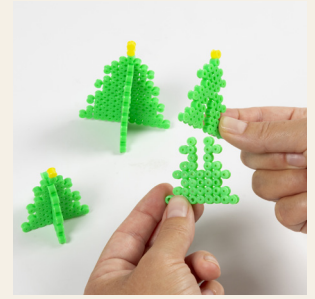

1 - Print out the stencils. Make all the designs on the square board. The transparent sheet can be placed on top of the stencils.

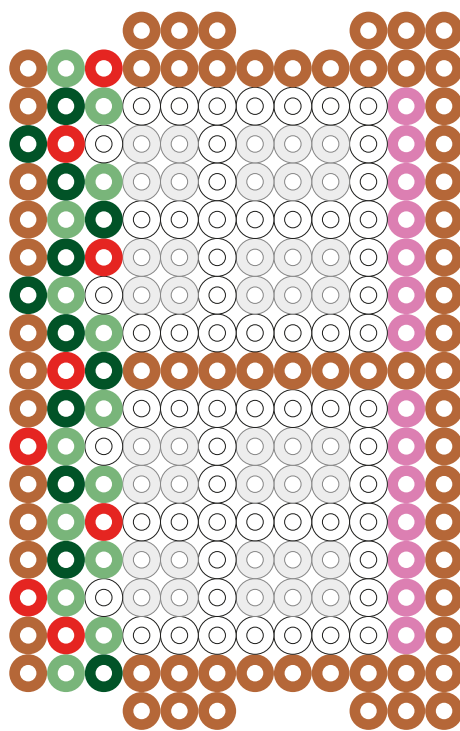

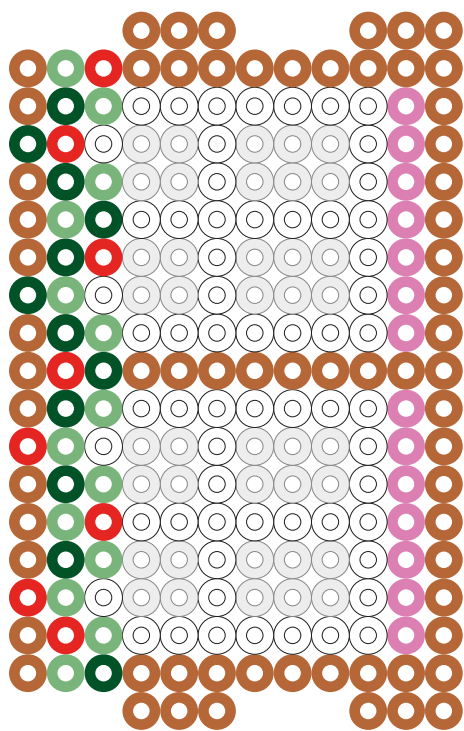

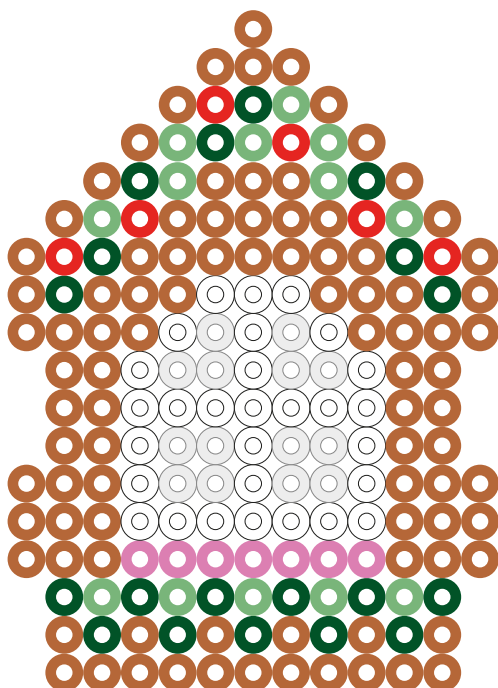

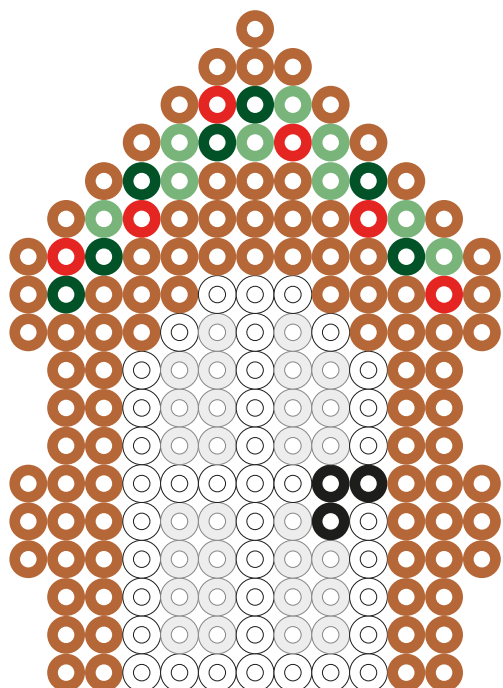

2 - Place the iron on cotton setting and place a sheet of baking paper over the beads. Now, melt the beads together. Lightly iron the pegboards on both sides so that the beads melt together.

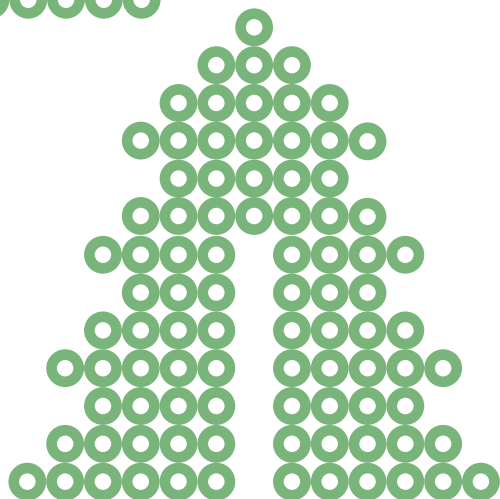

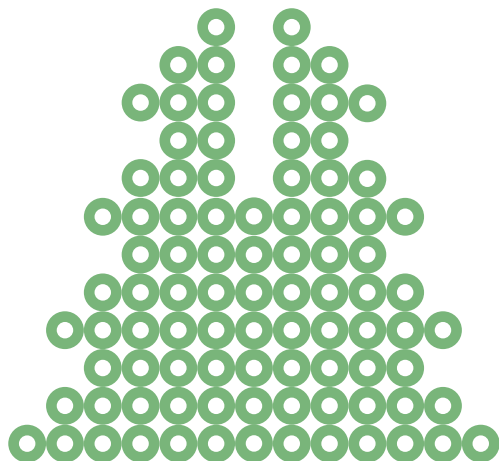

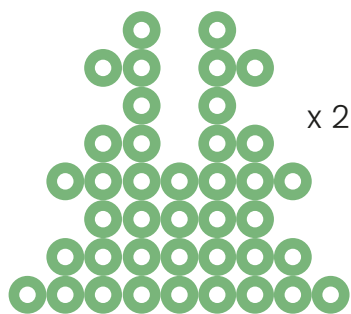

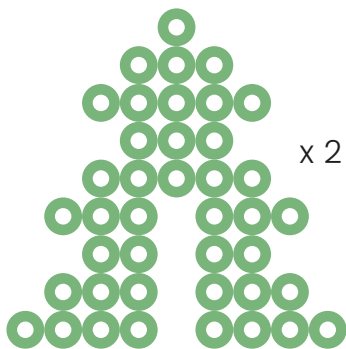

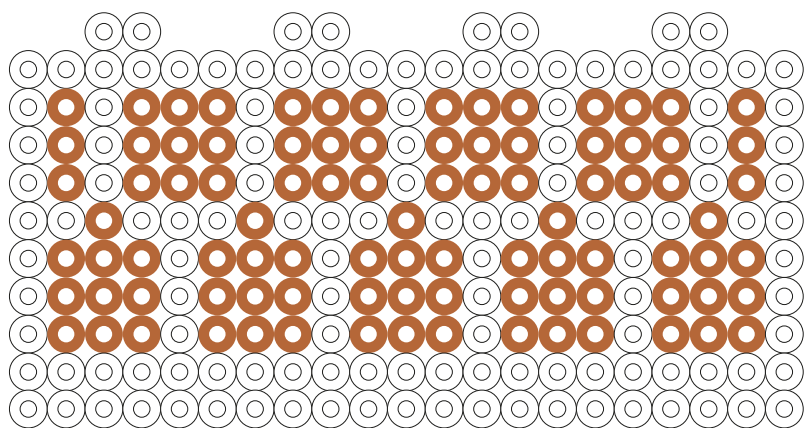

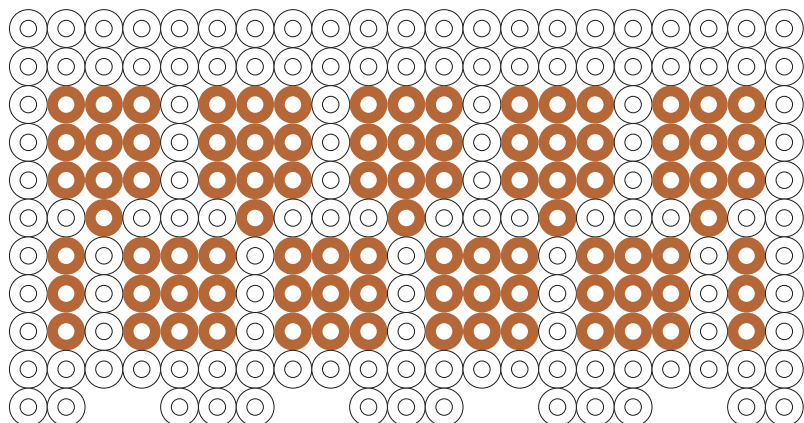

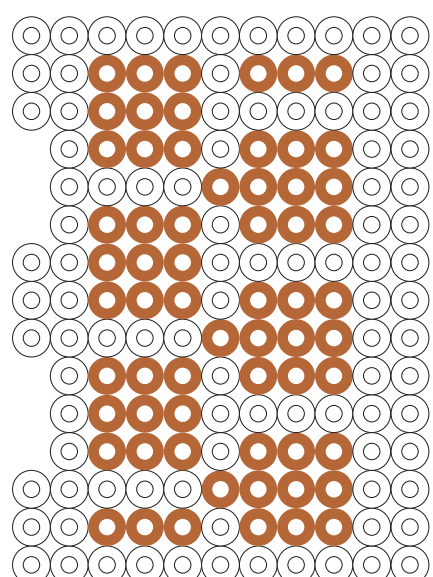

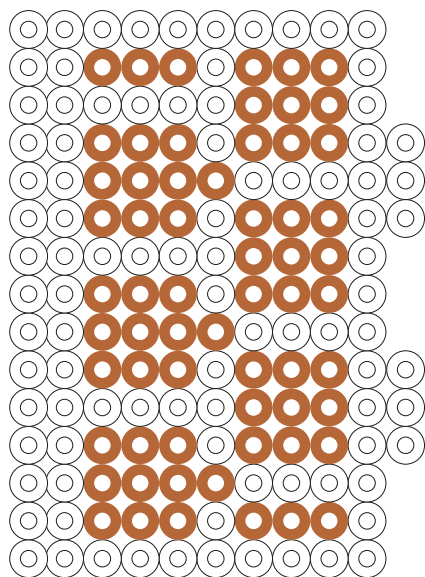

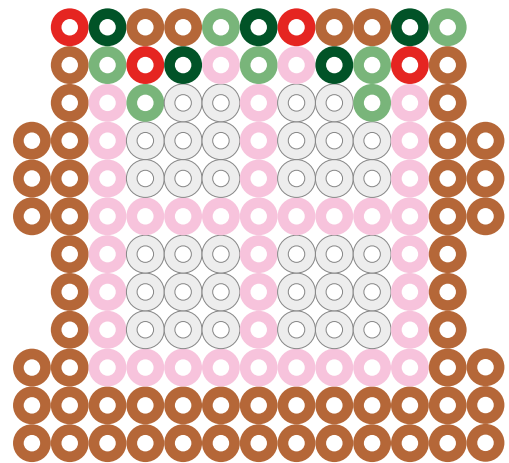

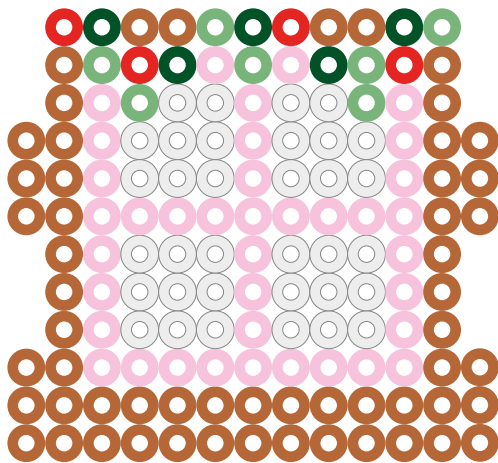

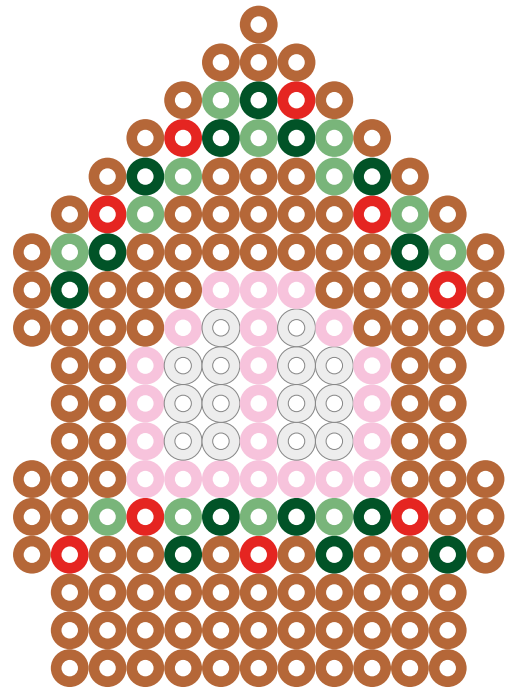

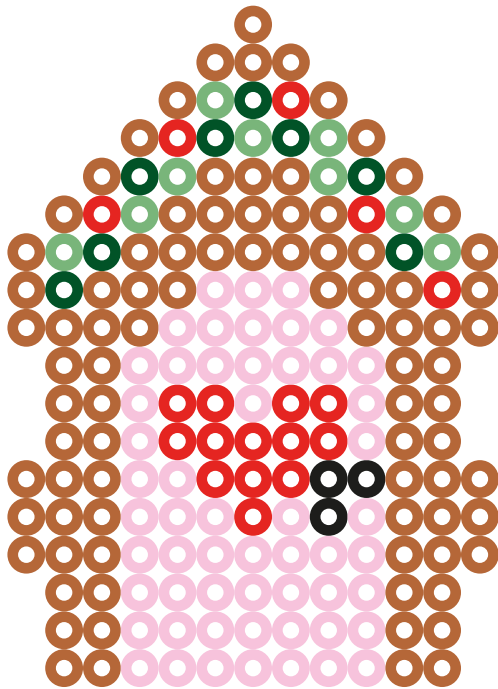

3 - Assemble the roof and houses by clicking the parts together.

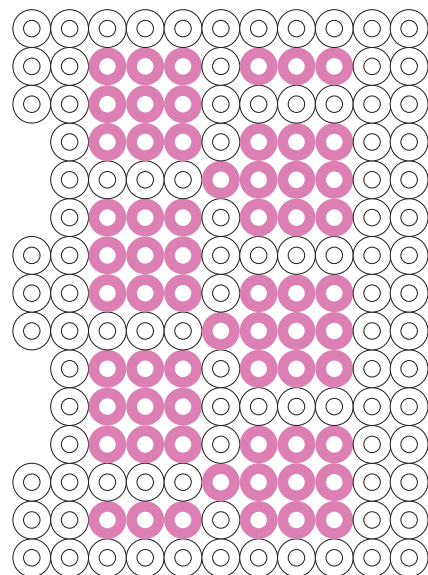

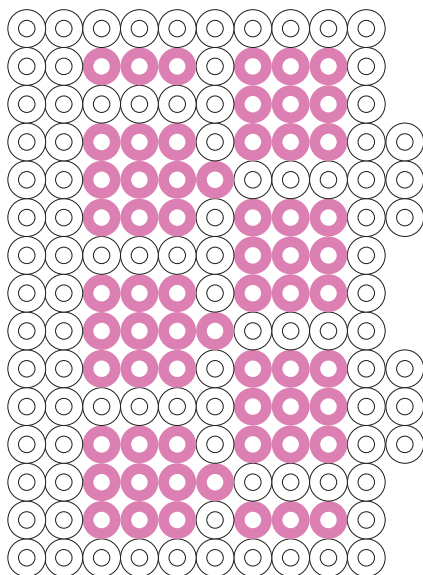

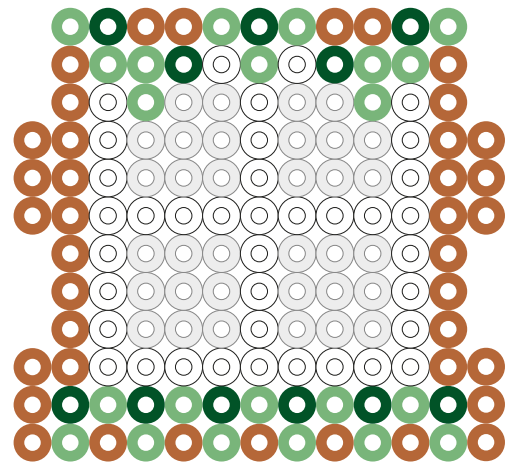

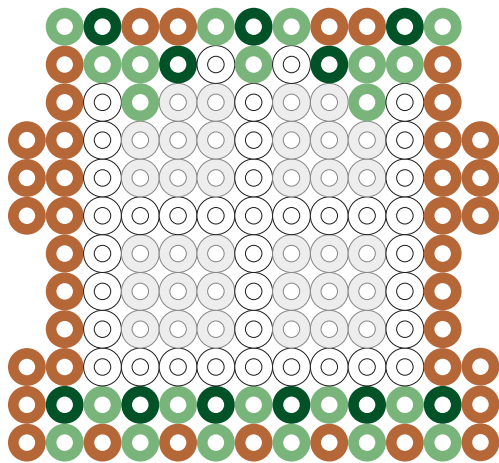

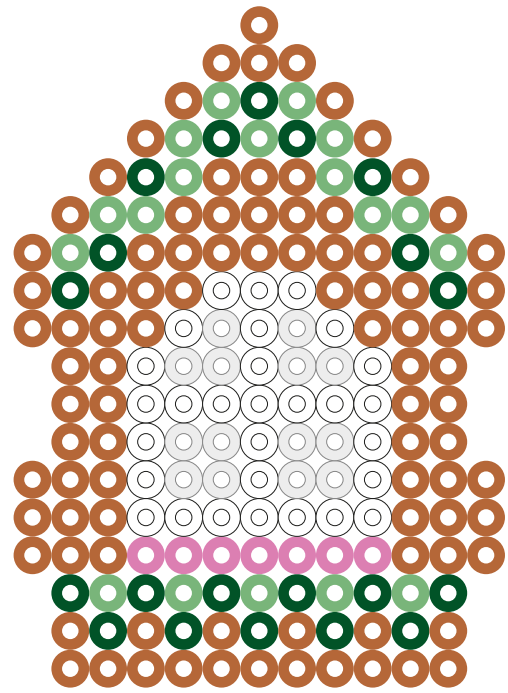

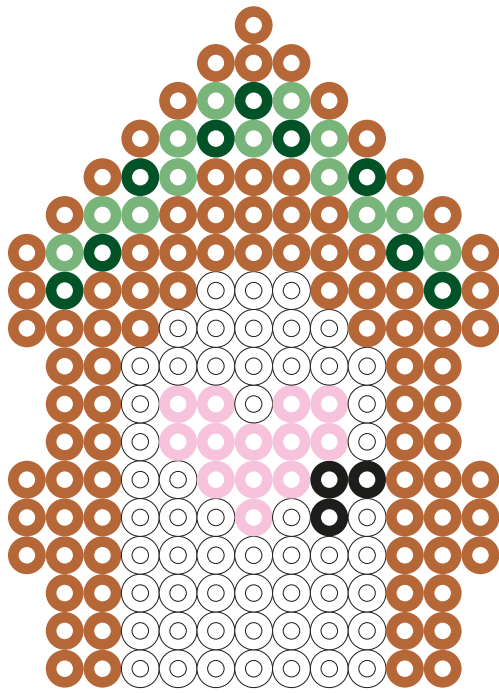

4 - Assemble the Christmas trees by placing one part on top of the other.

3D reindeer and fused bead Christmas gifts

Step-by-step
instructions

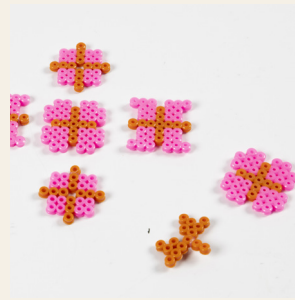

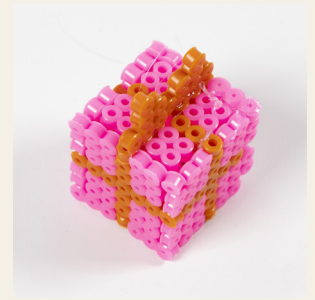

1 - Use a transparent peg board and place it on top of the template. Place the beads according to the pattern in the desired colours.

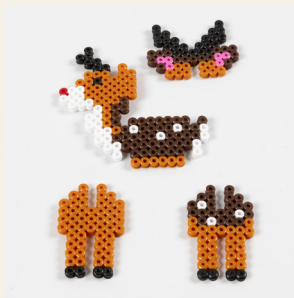

2 - Place a piece of baking paper over the finished peg boards and gently iron the beads. Do not press them flat, as this will make it difficult to assemble the parts later. Iron one side first while the design is still on the peg board. Next, remove the beads from the peg board, turn the design over, place baking paper on top again and gently iron the other side. The beads should be stuck together, but still retain their shape.

3 - Assemble the parts by placing them as shown in the picture and carefully click them together. The plate furthest to the right should be placed last after the other parts are joined. Finally, attach the bow to the small hole for this purpose.

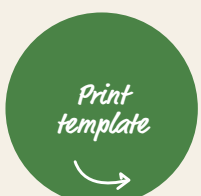

4 - Here you can see the finished present. Repeat steps 1-3 to make the remaining presents.

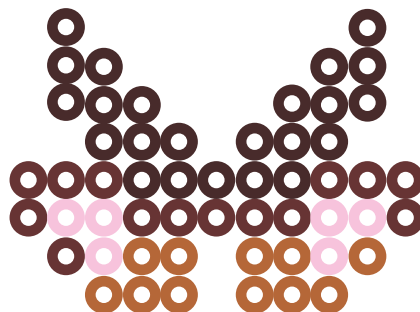

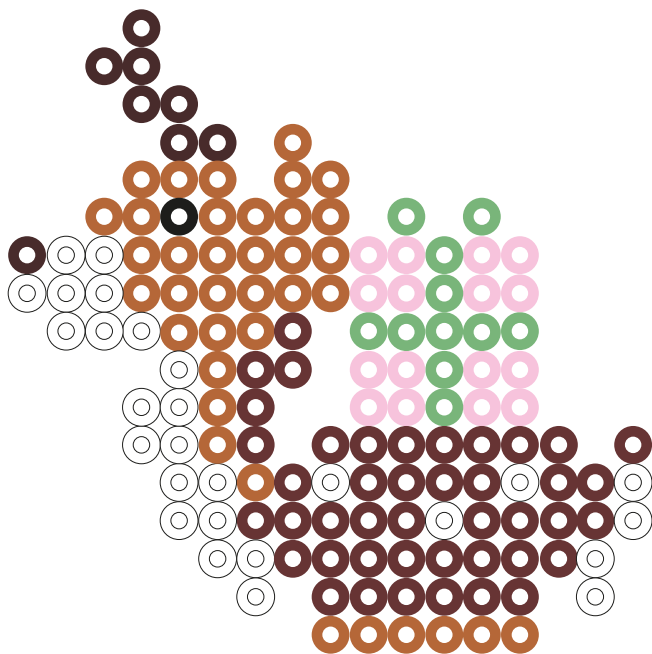

5 - Repeat steps 1-2 to make the reindeer. Next, assemble the reindeer by following the next step.

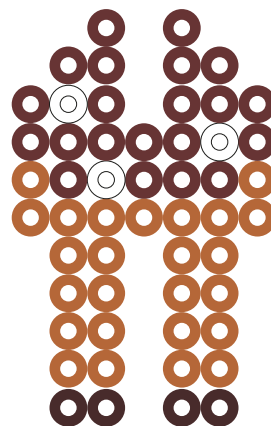

6 - This is what the finished reindeer look like. Finish off your little presents and reindeer with a sprinkle of glitter: First brush a little glue on the surface, then sprinkle glitter over it and allow to dry. Your lovely Christmas creations are now ready for use.

Hanging Christmas decoration made from fuse beads

Step-by-step
instructions

1 - Use a transparent peg board and place it on top of the template. Place the beads according to the pattern.

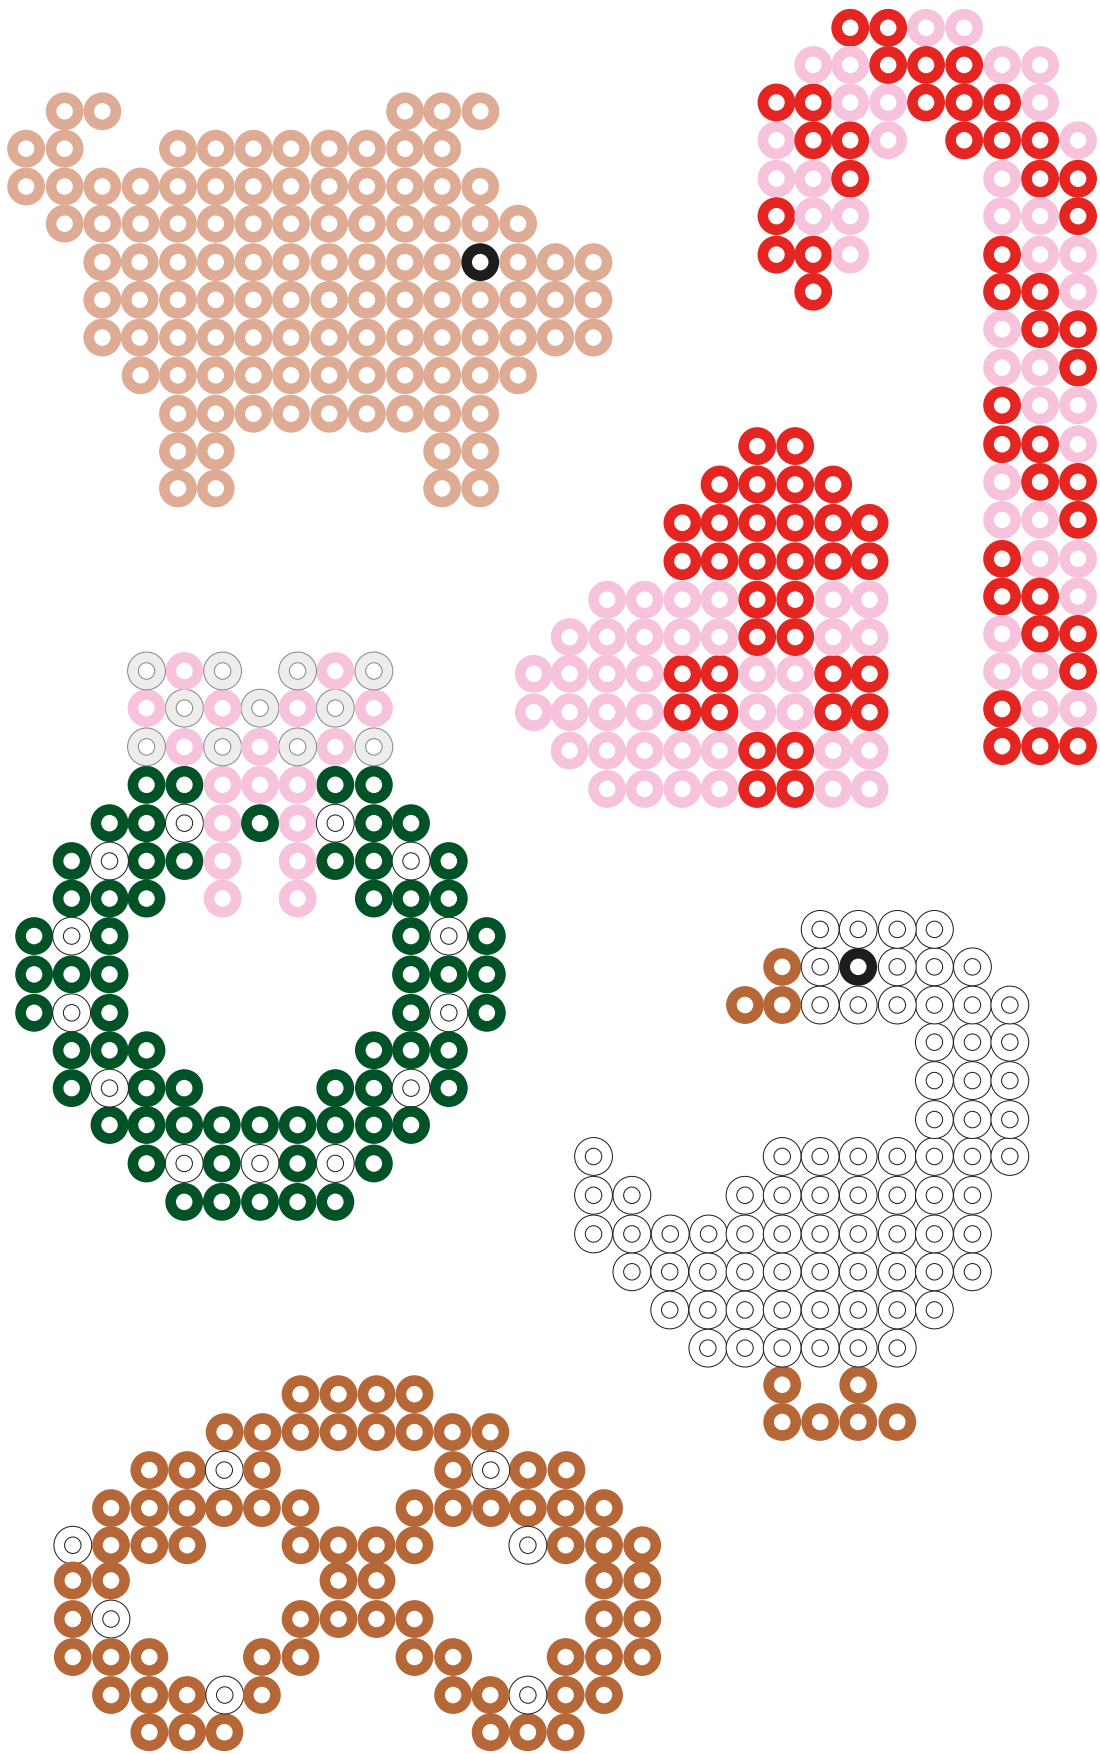

2 - Place a piece of baking paper over the design when finished. Gently iron the fuse beads together, but avoid pressing them flat. If necessary, iron on both sides for extra durability.

3 - Cut a piece of satin ribbon and tie it into a beautiful bow on your hanging decoration. Finish by threading a piece of thread through one of the top beads and tying a small loop. Your design is now ready to be hung up.

Fuse bead tic-tac-toe with Christmas designs

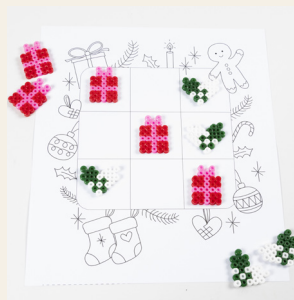

1 - Use a transparent peg board and place it on top of the template. Place the beads one by one according to the design. You need five of each type.

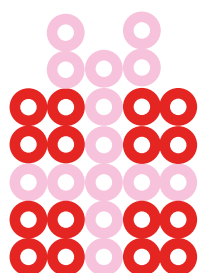

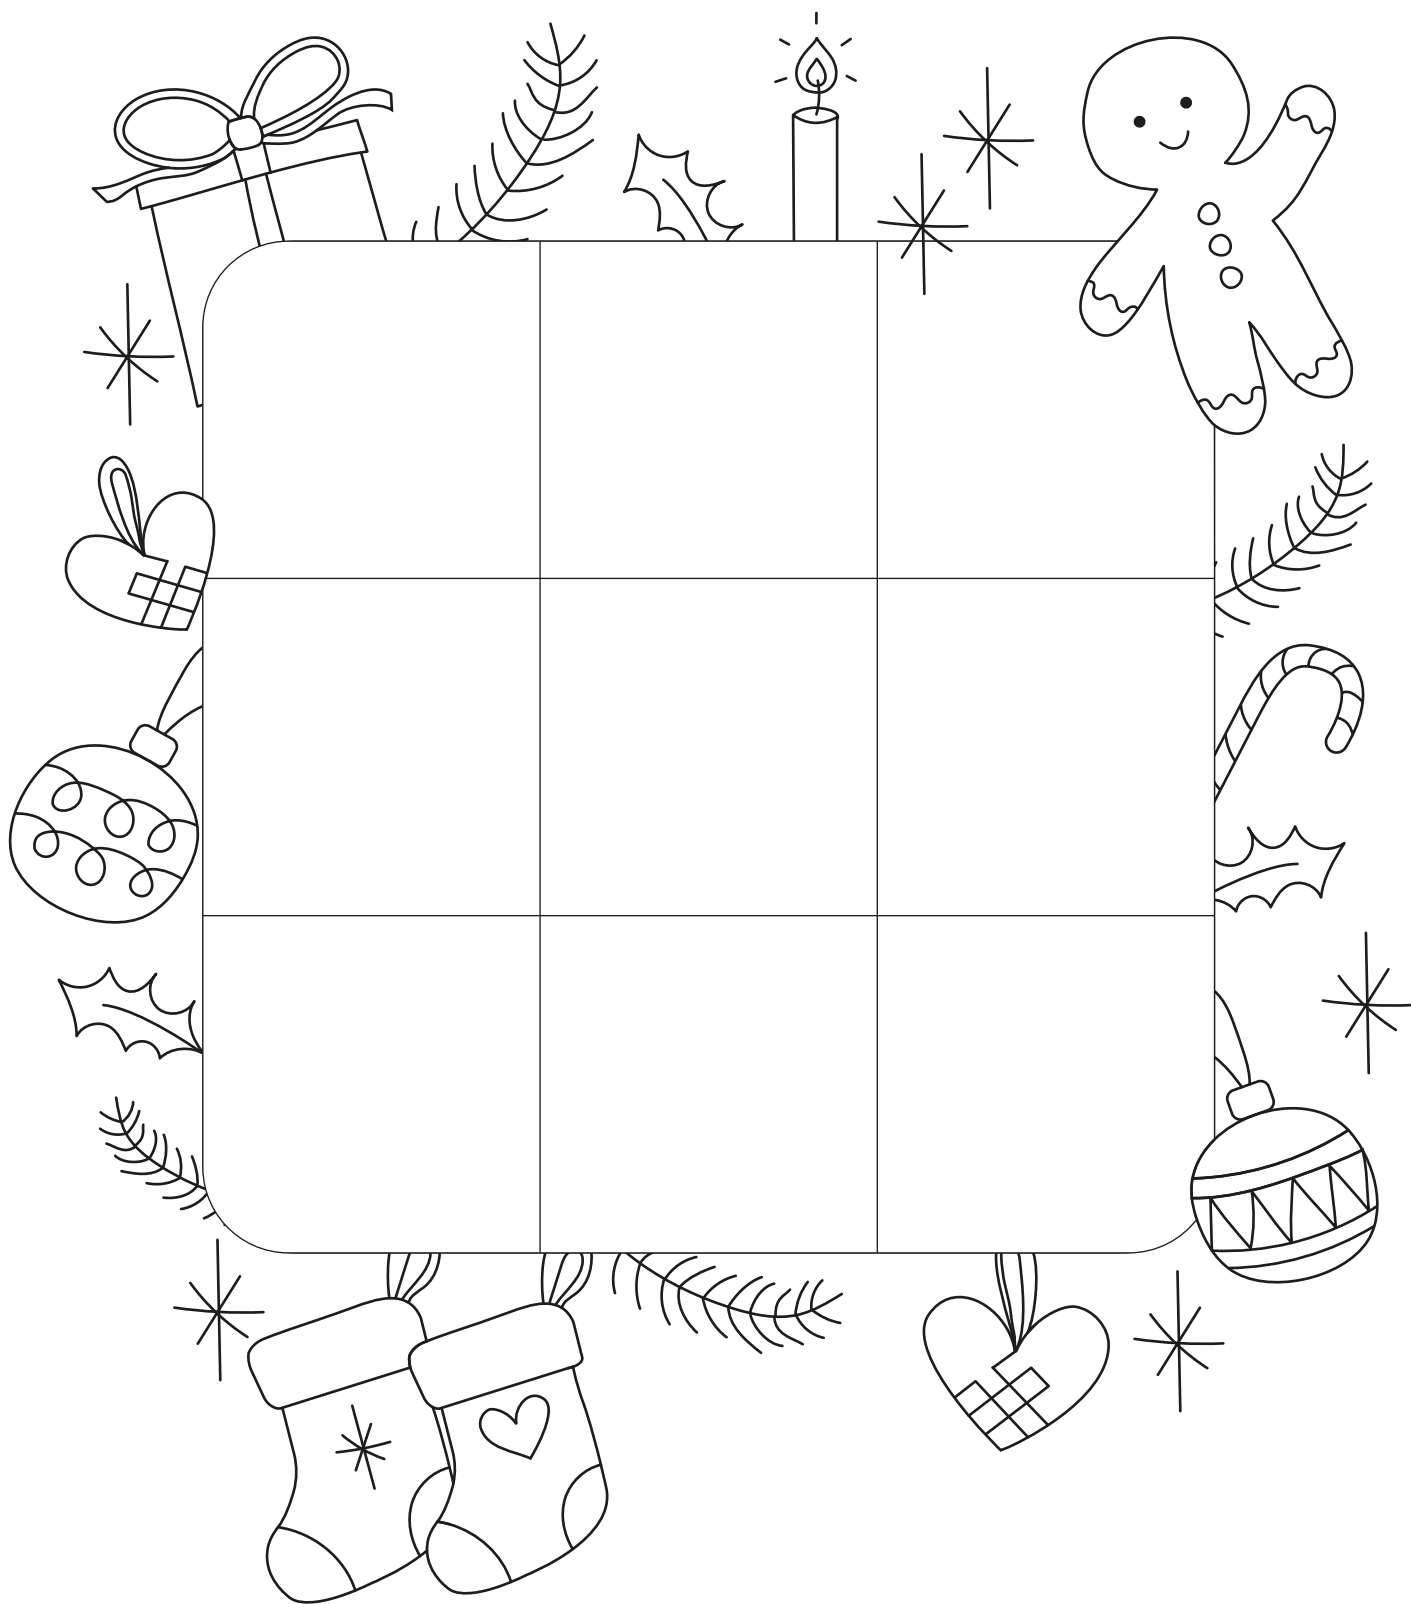

2 - Place a piece of baking paper over the finished bead designs and iron until all the beads are stuck together. If necessary, iron on both sides for extra durability, but be careful not to iron the beads too flat.

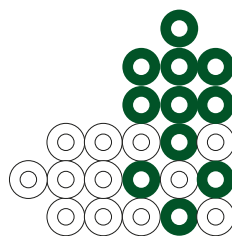

3 - You are now ready to play. Colour in the game board if you want to add a little extra Christmas spirit.
